Personal Statement

I currently work as software analyst at NETS (Network for Electronic Transfers) or more commonly known as EFTPOS in New Zealand and Australia. As an experienced Test Analyst, I would like to contribute my skills and knowledge that I acquired in Singapore into New Zealand market. I am looking to further develop my technical skills in other IT areas. I am passionate about keeping up to date with the latest technologies coming on the market and dedicated to working in the banking industry.

Work History

Software Analyst, NETS-Network for Electronic Transfers, Singapore (Full Time)
July 2018 – *Present*

Recently joined NETS as a L2 Support/Analyst for EFTPOS payment system. One of my major roles here is testing various payment technologies, NETS payment terminal, and test newly developed online payment apps.

Responsibilities:

- Involved in various NETS products testing such as NETSPay, NETS QR, NETS Contactless Card, and NETS Flash Pay.
- Understand the product requirement and prepare test cases.
- Involved in Card Scheme Certification testing by following EMV standards.
- Involved in EFTPOS terminal network connection testing, and load terminal configuration test.
- Prepare and run regression test when there is new software released.
- Perform error handling on EFTPOS terminal as well as test for redemptions, cash back, refund, and balance enquiry.
- Execute test cases and report defects using tools such as JIRA and HP ALM.

Associate Test Analyst, PACTERA, Singapore (Temporary)

Client: United Overseas Bank, Singapore (UOB).

April 2018 – July 2018

Worked as an associate tester under SIT team for multiple CR projects. Some of the projects are for countries like Indonesia, Malaysia, and Singapore.

Responsibilities:

- Design test case based on requirements and functionality.
- Involved in test executions and preparing the daily status reports.
- Involved in defect review meetings with the Development team.
- Defect reporting using latest tool such as JIRA and coordinate with development team on bug fixing.
- Preparing test data and verify in Oracle Database.
- Verifying customer bugs and internal defects for various releases in all products in our test environment like – QA, SIT, UAT and Prod/Regression Testing.

Software Test Engineer, DBS – Development Bank of Singapore (Full Time).

August 2017 – March 2018

Project Description: **PROJECT LANTERN 2017**

Lantern is a DBS and ANZ migration project. In October 2016 DBS has acquired the retail banking and wealth management business of ANZ and integrated into DBS digibank and internet banking in Indonesia. Some new features was implemented into lantern such as biometrics technology, customer service that is provided by a 24/7 all driven virtual assistant, intelligence financial planning and monitoring services and an in built security system.

Strengths and achievements:

- Preparing, designing, and developing test cases
- Executing the test cases using simulator (mobile testing) using multi platform devices (Android & iOS)
- Trained in using HPQC, to upload test cases, create test cases, and execute test cases
- Raising defects and follow up with the developers of the status
- Using SOAP UI for Biometric technology
- Testing the Reports (Formatting, Formulas etc)
- Working together with SIT team to find the bugs
- Attending meeting with development team in fixing the bug

- Performing different types of Black Box, Regression Testing, Functional and non functional testing
- Logging and tracking defects to closure
- Develop, design documents and user manuals.
- Working on UAT Phase

Education

Bachelor of Science, (Cyber Forensics, Information Security & Management major)
Murdoch University Perth, Australia, 2016.

Relevant subjects include:

- Systems Analysis & Design
- Databases
- Information Security
- IT Project management.

Interests and Hobbies

I am a very active person who loves mountain climbing, going to the gym, running, and watching series on Netflix in my free time. I am also an avid traveler who loves exploring the country sides and the beauty of nature.
